## **DETAILED ACTION**

Page 2

### Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 12 16 are rejected under 35 U.S.C. 102(b) as being anticipated by Giger (5,133,020).
- 3. In regards to claims 12 15, it should be noted that a system must distinguish from the prior art in terms of structure rather than function. See MPEP 2114. The only structure positively recited in these claims is an image acquisition device, a processor and an interface unit. All the other features are recited functionally and assigned to the processor or interface unit by way of "adapted to" clauses, which render them mere statements of intended use. They are of no patentable significance. Moreover, the processor and interface unit in Giger may be "adapted to" perform these same functions.
- 4. Giger discloses in the paragraph starting at column 4, line 47 a medical image acquisition device (mammograms, are obtained from x-ray images). The system disclosed by Giger in the above-mentioned paragraph requires a computer to carry out, which requires a processor. Finally, Giger states, "The final output of the overall scheme is the display of the suspect lesion". A display is an interface unit.

Application/Control Number: 09/683,321

Art Unit: 2621

5. In regards to claim 16, as shown in the rejection of claim 12, Giger discloses taking mammograms, which are obtained from an x-ray system. Thus Giger specifies an image acquisition device that is an x-ray system.

### Allowable Subject Matter

- 6. Claims 1 11 allowed.
- 7. The art of record does not teach nor does it suggest the specific features called for in the claims, particularly using fixed radius spheres as building blocks in region growing for the purpose of segmenting a three-dimensional medical image.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

#### Conclusion

- 8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
- 9. US Pat. 5,352,613 discloses a method of cellular screening which uses circular kernels (see the paragraph starting at column 9, line 7) for dilation and erosion.
- 10. US Pat. 5,553,207 discloses a method of three-dimensional segmentation using region-growing.
- 11. US Pat. 6,246,784 discloses a method of three-dimensional medical image segmentation using seed based region-growing.

12. Edward A. Ashton, KJ Parker, MJ Berg, CW Chen, "A Novel Volumetric Feature Extraction Technique, With Applications To MR Images", 0-8186-7310-9/95, IEEE, pp. 564-567, 1995. discloses another method of three-dimensional medical image segmentation using seed based region-growing

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher L Lavin whose telephone number is 703-306-4220. The examiner can normally be reached on M - F (8:30 - 5:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Leo Boudreau can be reached on (703) 305-4706. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
